

# MASKS RETAINER

Alps Retainer is designed to ensure a perfect fit to the face for any ALPS masks, as well as any other mask on the market.

The Retainer is heated and thermoformed directly on the face applying pressure where necessary.

This product will allow you to perfectly cast the users facial features, therefore eliminating the need to thermoform again, unless desired. This allows the Retainer to be used for infinite applications.

The logo features a stylized 'A' with a blue swoosh, followed by 'SkinCare' in a large serif font. Below 'A' are the letters 'A L P S' in a smaller font. Below 'SkinCare' is the word 'DIVISION' in a very small font.
