

EYE PETALS

UNDER EYE CARE

The Eye Petals are infused with high concentrations of lipophilic antioxidants that are able to penetrate the lipid bilayers that surround our cells and neutralize the peroxide and hydroxyls; which are the by-products of oxidative stress.

The Eye Petals may prevent signs of aging such as fine lines, wrinkles, crow's feet, etc.

Contact your Sales Representative to learn more about the different customization options such as: Shape, Size, Color, Additional/Active Ingredients (oil-based), Fragrance, Packaging, Private Label/Logo, etc.
